Pune, Maharashtra, India

PROFESSIONAL SUMMARY

Cybersecurity and backend-focused software engineering undergraduate with hands-on internship experience in **REST API development, database management, secure backend services, and full-stack integration**. Proficient in **Python, Flask, FastAPI, MongoDB, and MySQL** with a strong emphasis on **clean, scalable, and well-documented code**. Experienced in **code reviews, CI/CD workflows, and application security best practices**. Currently interning as a Software Developer at BrainUpKids. Seeking a **Junior Backend Developer** role to contribute to real-world backend systems, API development, and product enhancements.

EDUCATION

Symbiosis Skills and Professional University <i>Bachelor of Technology in Cyber Security CGPA: 8.34/10.0</i>	Pune, India <i>Expected Graduation: 2026</i>
Assam Rifles Public School <i>Senior Secondary (Class XII) – CBSE Percentage: 82.6%</i>	Jorhat, Assam <i>2022</i>
Assam Rifles Public School <i>Secondary (Class X) – CBSE Percentage: 84%</i>	Jorhat, Assam <i>2020</i>

PROFESSIONAL EXPERIENCE

Software Development Intern <i>BrainUpKids</i>	Pune, India <i>2026 – Present</i>
- Developing and maintaining backend applications and APIs for an EdTech platform serving young learners - Working on database management, query optimization, and performance tuning to ensure reliable and fast application responses - Collaborating with frontend developers and cross-functional teams for smooth API integration and feature delivery - Writing clean, scalable, and well-documented code following established coding standards and best practices - Participating in code reviews, debugging sessions, and contributing to ongoing product enhancements	
Web Development Intern <i>SpareXpert</i>	Bhopal, India <i>June 2025 – August 2025</i>
- Developed and tested secure REST APIs and backend services with authentication and role-based access control for a real-world web platform - Managed database design, query optimization, and performance improvements using MySQL and MongoDB to enhance application reliability - Collaborated with frontend developers to ensure seamless API integration and smooth cross-functional delivery of features - Applied secure coding standards to mitigate SQL injection and XSS vulnerabilities, ensuring application security and reliability - Assisted in deployment workflows and CI/CD integration, participating in code reviews and maintaining well-documented codebases	
Python Programming Intern <i>YBI Foundation</i>	Remote <i>June 2024 – August 2024</i>
- Built Python automation tools and backend scripts for data processing, workflow optimization, and task automation - Gained practical exposure to AI, Machine Learning, and cybersecurity tools under professional mentorship - Followed clean-code principles and structured documentation standards, producing maintainable and reusable code modules - Developed problem-solving and debugging skills applicable to backend troubleshooting and performance monitoring	

TECHNICAL SKILLS

Backend Development: Python, Flask, FastAPI, REST API Design & Development, API Testing, Server-Side Logic
Database Management: MySQL, MongoDB, Query Optimization, Database Design, Performance Tuning
Programming & Scripting: Python, JavaScript, SQL, Bash Scripting, Clean Code Practices
DevOps & Tools: Git, GitHub, Docker, CI/CD Concepts, Linux System Administration, Deployment Support
Application Security: Secure Coding, Input Validation, OWASP Top 10, Role-Based Access Control (RBAC)
Frameworks & Integration: Flask, FastAPI, Frontend-Backend Integration, Cross-functional Collaboration
Soft Skills: Code Review, Technical Documentation, Debugging, Problem Solving, Team Collaboration

KEY PROJECTS

Fake Review Detection API | *Python, FastAPI, Machine Learning, MongoDB*

- Developed and deployed a **fully functional REST API backend** using FastAPI with **authentication, input validation, and structured logging**
- Designed **scalable database schema** in MongoDB with optimized queries for real-time data retrieval and analysis
- Implemented **clean, well-documented, modular code architecture** with error handling and audit trail mechanisms
- Integrated ML model as a backend service demonstrating ability to **collaborate across technical layers and deliver production-ready APIs**

Cybersecurity Reconnaissance Tool | *Python, Automation, Modular Architecture*

- Built a **modular Python backend tool** with extensible architecture, structured logging, and comprehensive error handling
- Demonstrated **clean code practices, reusable module design, and technical documentation** standards applicable to backend development
- Implemented **automated data collection pipelines** and processing workflows with performance-optimized execution

J.A.R.V.I.S – AI Automation System | *Python, API Integration, Backend Automation*

- Developed a **multi-API integrated backend system** for task automation, system interaction, and real-time command execution
- Designed **modular backend architecture** with robust error handling, logging, and operational reliability mechanisms
- Demonstrated ability to **learn, adapt, and integrate new APIs and frameworks** independently into a working production system

CERTIFICATIONS & VIRTUAL EXPERIENCE

Mastercard Cybersecurity Job Simulation – Mastercard via Forage
REST API Development with FastAPI – freeCodeCamp
Python Essentials 1 & 2 – Cisco Networking Academy
Machine Learning with Python – IBM SkillsBuild
Cisco Ethical Hacker – Cisco Networking Academy
Cybersecurity Essentials – Cisco Networking Academy

ACHIEVEMENTS

- **Hicathon Capture The Flag (CTF) – 7th Rank Nationwide:** Demonstrated strong **analytical, problem-solving, and technical debugging** skills under competitive conditions – directly applicable to backend troubleshooting and development
- **4 Internships Completed:** Successfully completed internships across **cybersecurity, Python development, web development, and software development** domains, demonstrating consistent ability to **learn new technologies and deliver results in professional environments**
