Pune, Maharashtra, India

PROFESSIONAL SUMMARY

Final-year **Cyber Security** undergraduate with a strong dual profile in **secure backend development and cybersecurity operations**. Hands-on experience across **4 internships** spanning REST API development, vulnerability assessment, OSINT, Python automation, and network security. Proficient in **Python, Flask, FastAPI, MongoDB, MySQL, Kali Linux, Burp Suite, and Wireshark**. Achieved **7th rank nationwide** in a Cybersecurity CTF. Passionate about building **secure, scalable systems** at the intersection of software development and information security.

EDUCATION

Symbiosis Skills and Professional University

Bachelor of Technology in CSIT | CGPA: 8.2/10.0
CyberSecurity specialization

Pune, India

Aug 2022 – July 2026

Assam Rifles Public School

Senior Secondary (Class XII) – CBSE | Percentage: 82.6%

Jorhat, Assam

2021

Assam Rifles Public School

Secondary (Class X) – CBSE | Percentage: 84%

Jorhat, Assam

2019

PROFESSIONAL EXPERIENCE

Software Development Intern

BrainUpKids

Pune, India

2026 – Present

- Developing and maintaining **backend applications and REST APIs** for an EdTech platform, implementing **secure authentication and access control** mechanisms
- Managing **database design, query optimization, and performance tuning** ensuring reliable and fast application responses
- Collaborating with frontend developers and cross-functional teams for **smooth API integration and feature delivery**

Web Development Intern

SpareXpert

Bhopal, India

June 2025 – August 2025

- Built and tested **secure REST APIs and backend services** with **role-based access control (RBAC)** and JWT authentication
- Managed **MySQL and MongoDB database design** with query optimization reducing response latency and improving overall system reliability
- Assisted in **CI/CD pipeline integration and deployment workflows**, participating in structured code reviews and maintaining documentation

Python Programming Intern

YBI Foundation

Remote

June 2024 – August 2024

- Built **Python automation scripts and data processing tools** under professional mentorship, gaining exposure to **AI, ML, and cybersecurity tooling**
- Developed reusable backend modules following **clean code principles and structured documentation** practices
- Gained practical knowledge of **attack methods, security concepts, and defensive strategies** applicable to secure development workflows

Cyber Security Intern

TechLang

Remote

June 2023 – August 2023

- Conducted **OSINT-based vulnerability assessments** and network security testing using **Kali Linux, Wireshark, and Metasploit** in controlled environments
- Performed **ethical hacking simulations and real-time security analysis**, identifying vulnerabilities aligned with OWASP frameworks

- Documented security findings with **structured risk assessment reports** and actionable remediation recommendations
- Applied **OWASP Top 10 secure coding standards** to mitigate SQL injection and XSS vulnerabilities across the application layer

TECHNICAL SKILLS

Backend Development: Python, Flask, FastAPI, REST API Design & Development, Server-Side Logic, API Testing, Secure Authentication

Database Management: MySQL, MongoDB, Query Optimization, Database Design, Performance Tuning

Cybersecurity: Vulnerability Assessment, OSINT, Network Security, Threat Analysis, Ethical Hacking, OWASP Top 10, Phishing Analysis

Security Tools: Kali Linux, Wireshark, Metasploit, Burp Suite, Nmap

Programming & Scripting: Python, JavaScript, SQL, Bash Scripting, Clean Code Practices

DevOps & Tools: Git, GitHub, Docker, CI/CD Integration, Linux System Administration, Deployment Support

AI/ML: Machine Learning, NLP, Fraud Detection, Behavioral Pattern Analysis, Data Analytics

KEY PROJECTS

Security Operations Center (SOC) Home Lab | *Wazuh, Windows, Linux, SIEM, Incident Analysis*

- Designed and deployed a **SOC home lab environment** using Windows and Linux virtual machines for security monitoring and attack simulation
- Configured **Wazuh SIEM** to collect, correlate, and analyze security logs, enabling real-time alert generation and threat detection
- Performed **incident investigation, log analysis, and IOC identification** to simulate real-world SOC analyst workflows and security operations
- Demonstrated practical knowledge of **threat detection, event correlation, vulnerability assessment, and security monitoring**

Fake Review Detection API | *Python, FastAPI, Machine Learning, MongoDB*

- Developed and deployed a **production-ready REST API backend** using FastAPI with **JWT authentication, input validation, and structured audit logging**
- Designed **scalable MongoDB schema** with optimized queries for real-time threat detection and fraud scoring
- Integrated an **ML model as a secure backend microservice** demonstrating full-stack backend delivery and cross-layer collaboration
- Implemented **secure input handling and data validation** aligned with OWASP API security best practices

CERTIFICATIONS & VIRTUAL EXPERIENCE

Mastercard Cybersecurity Job Simulation – Mastercard via Forage | *Phishing Analysis, Anti-Phishing Strategy, Security Awareness*

Cisco Ethical Hacker – Cisco Networking Academy

Cybersecurity Essentials – Cisco Networking Academy

Python Essentials 1 & 2 – Cisco Networking Academy

Machine Learning with Python – IBM SkillsBuild

REST API Development with FastAPI – freeCodeCamp

ACHIEVEMENTS

- **Hicathon CTF – 7th Rank Nationwide:** Achieved top-10 national placement in the HICA SSPU Capture The Flag competition, demonstrating strong skills in **threat analysis, vulnerability exploitation, and security problem-solving under competitive conditions**
- **4 Internships Across Cybersecurity & Development:** Successfully delivered across **cybersecurity, Python development, web/backend development, and software engineering** roles – demonstrating consistent ability to learn new technologies and contribute in professional environments
